This performance and risk analysis is based on the portfolio and its underlying investment managers' actual net of fee performance and may differ from the returns implied by the change in the portfolio's unit prices. The portfolio's unit price at month end is based on the unit prices of the underlying investment managers captured on the system on the last day of the month. These prices may be estimates (as provided by the manager) or may be in respect of a previous pricing date caused by a delay in manager price publication or managers not pricing daily. The returns include the return effect of redesignated side-pocketed Russian holdings and represents the returns applicable for an investor who did not change their unit holdings since May 2022.

The risk statistics reflected above are calculated over the period since inception (120 months).
